AI AWARENESS QUIZ - PART 2

50 One-Word / One-Sentence Questions

AI Models | Tools | Developer AI | Image/Video/Speech AI | Hardware | Safety | Responsible AI

Student Name :Tejas Mane

Batch : 9011# Internship Program 7:00 PM **Date:08/10/2026**

Q1. Which company developed the Llama family of AI models?
Ans: Meta

Q2. Gemini is developed by which company?
Ans: Google

Q3. Which company developed Claude?
Ans: Anthropic

Q4. Grok is developed by which company?
Ans: xAI

Q5. Which company develops Mistral AI models?
Ans: Mistral AI

Q6. GPT models are developed by which company?
Ans: OpenAI

Q7. Sora is mainly used for generating what?
Ans: Video content

Q8. Veo is an AI video generation model developed by which company?
Ans: Google

Q9. What is Midjourney mainly used for?
Ans: AI image generation

Q10. What is GitHub Copilot mainly used for?
Ans: AI-assisted coding

Section B: Generative AI Concepts

Q11. What does LLM stand for?
Ans: Large Language Model

Q12. What is Generative AI?
Ans: AI that creates new content such as text, images, audio, or video.

Q13. What is a prompt?
Ans: An instruction or input given to an AI.

Q14. What is a system prompt?
Ans: Instructions that define the AI's behavior.

Q15. What is multimodal AI?
Ans: AI that works with multiple types of data such as text, images, audio, and video.

Q16. What is an AI hallucination?
Ans: False or inaccurate information presented as correct.

Q17. What are tokens in LLMs?
Ans: Small units of text processed by an LLM.

Q18. What is a context window?
Ans: The amount of information an AI model can consider at one time.

Q19. What is inference in AI?
Ans: Using a trained model to generate an output.

Q20. What is fine-tuning?
Ans: Further training a pretrained model on specific data.

Section C: AI for Developers & Applications

Q21. What is an AI agent?
Ans: An AI system that performs tasks using tools and takes actions toward a goal.

Q22. What is the difference between a chatbot and an AI agent?
Ans: A chatbot mainly responds, while an agent can plan and perform actions using tools.

Q23. What is tool/function calling?
Ans: AI calling external functions or tools to perform tasks.

Q24. What does MCP stand for?
Ans: Model Context Protocol

Q25. What is an API key?
Ans: A key used for authentication or authorization when accessing an AI service.

Q26. What is an API rate limit?
Ans: A limit on the number of requests allowed during a specific time period.

Q27. What is Cursor?
Ans: An AI-powered code editor.

Q28. What is NotebookLM used for?
Ans: Working with and understanding user-provided documents and sources.

Q29. What is semantic search?
Ans: Meaning-based search rather than exact keyword matching.

Q30. Name three tasks AI can help developers with.
Ans: Code generation, debugging, and documentation.

Section D: Image, Video, Speech, Models & Hardware

Q31. What is speech-to-text?
Ans: Converting spoken audio into text.

Q32. What is text-to-speech?
Ans: Converting text into spoken audio.

Q33. What is OCR?
Ans: Optical Character Recognition, which extracts text from images.

Q34. What is a vision model?
Ans: An AI model that understands or analyzes visual information.

Q35. What is text-to-video AI?
Ans: AI that generates video from text prompts.

Q36. What is diffusion commonly used for?
Ans: Image and media generation.

Q37. Why are GPUs useful for AI?
Ans: They perform parallel mathematical computations efficiently.

Q38. What does NPU stand for?
Ans: Neural Processing Unit

Q39. What is VRAM used for in AI?
Ans: Storing model data, weights, and intermediate computations.

Q40. What is a local model?
Ans: A model that runs on your own device instead of a remote server.

Section E: Advanced Awareness, Safety & Responsible AI

Q41. What is an open-weight AI model?
Ans: A model whose trained weights are publicly available.

Q42. What is knowledge distillation?
Ans: Training a smaller model to reproduce the behavior of a larger model.

Q43. What does LoRA stand for?
Ans: Low-Rank Adaptation

Q44. What does MoE stand for?
Ans: Mixture of Experts

Q45. What is an AI benchmark?
Ans: A standardized test used to compare AI models.

Q46. What is a guardrail in AI?
Ans: A safety mechanism that controls AI application behavior.

Q47. What is prompt injection?
Ans: Malicious instructions intended to manipulate an AI system.

Q48. What does PII stand for?
Ans: Personally Identifiable Information

Q49. Why should confidential data not be entered into AI tools carelessly?
Ans: It may expose sensitive information or create privacy/security risks.

Q50. How should you verify an AI answer before making an important decision?
Ans: Verify it using reliable sources.
